& REUSABLE**

FASHION FACE MASKS

Make your own face masks to sell in store or give the pattern out to your customers to make their own.

Note: This is not a replacement for N95 masks or a medical mask, it is a fashion mask that is washable and reusable. Ensure you wash and disinfect daily, refrain from touching the mask consistently and instead, remove via the elastics. You may like to carry a ziplock bag to place the mask in until you get to the washing machine. There are many resources online regarding proper use and care, as well as other patterns.

You will need:

2 x Fabrics and 1 x non-woven interfacing cut to 6.5" x 9". If you can not source interfacing, use a 3rd piece of fabric

Elastic (3mm preferred), 2 x 15cm lengths

Method:

Notes: these only take a couple of minutes to sew from start to finish, we recommend using 2 different fabrics so you know which side has touched your face. Suitable for adults, you may like to adjust the pattern to suit a child or a better fit for you.

1. On fabric one: Apply interfacing if using. Pin elastic 1/4" from each corner.
2. Lay fabric two on top of fabric one, right sides together, and stitch around all sides using 1/4" seam allowance, leaving 1" opening in the centre of one side.
3. Turn right sides out and press.
4. Press a centre line and using pins, make a box pleat on each side.
5. Top stitch 1/8" along the edge, down both sides to complete.
